THE TRUCK SEAT WITH THE RIGHT STUFF

Built around the top selling seat spec in the truck industry, the KM 1115 features the right adjustment points to ensure you have a supportive and comfortable ride. The air lumbar, generous 7" track travel, thigh extension and continuous 6° - 23° recline, rear cushion tilt and ratching adjustable armrests all allow you to customize the seat position to fit your body. Fixed back and cushion bolster support provides extra lateral stability for your body as well. The air lumbar provides continuous range of adjustment rather than providing a few hard stops as most mechanical lumbar systems do. This enables you to get the right support and comfort.
