

Installation Guide

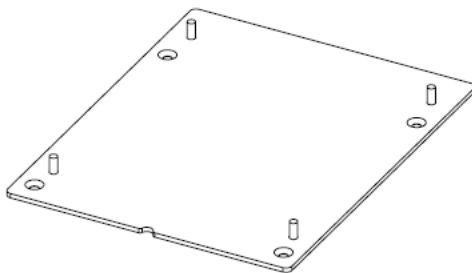

JD 6000-7000 Series Original Suspension Replacement Kit Installation (PN: 6877)

KM MSG95 Air
Suspension
PN: 8077

Original Seat

1. Remove the original seat and suspension from the tractor.
2. Remove the seat and slide rails from the original seat and bolt to the new suspension using the original hardware.
3. Bolt the 6154 PED into the cab using four 8 mm x 25 mm flat head socket cap screws and four .225" spacers. The spacers go in between the 6154 PED and the cab floor.
4. Place the seat and suspension onto the studs of the 6154 PED and fasten in place using four 5/16" serrated flange nuts.
5. Connect the wiring. The OPS plug goes to the purple and orange wires.
