

Installation Guide

Skid Plate Safety Step Installation (PN: 3453)

1. Hold the step up to the skid plate where you want the step and mark the location of the holes. See diagram below for recommended step locations.
2. Drill the holes using a 9/32" drill bit.
3. Fasten the step using the 5/16" x 3/4" thread cutting bolts provided.

Recommended locations
for safety step.
