Fold forward and reclining backrest adds comfort and versatility

Low-profile air suspension with self-contained 12-Volt air compressor

When you sit on the seat and press switch once, it brings you to the optimum level for 2" suspension stroke (1" up and 1" down). At this level, the seat is suitable for forklifts with an SIP height of 8.66". Then you can press the switch for as long as you like up to another 2.36". This is shown as height adjustment on the attached drawings. With full 4.33" suspension stroke, this seat is suitable for tractors.

See **REVERSE** for applications, drawings and options.

- Seat belt fixation points
- Seat height adjustment of 1.77"
- 2" suspension travel
- 4.33" suspension stroke
- Comes standard with operator presence switch that meets OEM safety standards
- Durable rubber molded suspension cover
