

Installation Instructions to Replace an Original Seat with a Uni Pro™ - Seat using Original Swivel and Suspension in an FNH 70 Genesis Series Tractor

1000/1003
Seat 8229

1. Remove original seat top from swivel.
2. On new seat remove seat cushion by pulling up on front of cushion while holding down metal pan base (cushion clips should pop out from bottom of seat pan with a little jerk upward).
3. Attach the SAP 6099 to the seat bottom with four 5/16-18 bolts and flange nuts. Note: Side cut outs on SAP 6099 face forward towards front of seat (see image).
4. Attach 6099 plate and seat assembly to original swivel top with four 5/16 -18 bolts and flange nuts.
5. To relocate original air switch located in armrest attach switch bracket 10840 to left side and front hole on SAP 6099 using same bolt and nut installed in step 4.
6. Original armrest located suspension switch can then be relocated to bracket installed in step 5.
