

1. Attach the Safety Switch to the Attachment Plate as shown in **Figure A**. Use two 3/16" x 1/2" cut screws.

2. Place a flat washer, spring and another flat washer onto the 5/16" bolts as shown in **Figure B**.

3. Place one bolt, spring and washers into one of the two square holes on the bottom of the seat as shown in **Figure C**.

4. Bolt the attachment plate to the bottom of the seat with a 5/16" center lock nut, as shown in **Figure D**.

5. Repeat steps 3 and 4 for the other side of the attachment plate.

6. Tighten the lock nuts so they are flush with the end of the bolts as shown in **Figure E**.

7. Attach seat and attach wires to the safety switch.
